# Feeds Available

## Poultry Feeds

- **Chick Starter** -20% Protein formula. Ideal for starting chicks and waterfowl, small sized mash with starter grit added for better digestion and utilization of feed. Feed from hatch to 6 weeks of age.
- **Pullet Grower/Developer** - 16% Protein formula. Formulated with ideal components to develop healthy and productive laying hens. Mash size is larger than Chick Starter and slightly smaller than Layer Feed, with Grower Grit added. Feed from 6 weeks of age until first egg.
- **Layer Feed** – 17% Protein formula. This is a whole grain mash feed formulated specifically for laying hens and ducks. Large size Layer Grit is added for digestion. Feed from first egg onward.
- **Meat Bird Feed** – 19% Protein Formula. Medium sized grind for quickly growing meat chicks. Can be fed from hatch to finish, or feed Chick Starter for the first 3 weeks then switch to Meat Bird Feed until harvest.
- **All Flock Feed** – 18% Protein Formula. Formulated for mixed flocks including turkeys, geese, chickens and ducks. Feed from 6 weeks of age onward. Can also be fed to laying hens as long as Oyster Shell is provided free choice.
- **Poultry Grit** - Essential for digesting mash feeds, this grit is packaged in convenient 5lb packages for the small producer, and comes in 5 sizes - we've got the right size for everything from newly hatched chickens to full sized turkeys.

## Swine Feeds

- **Swine Starter** – 18% Protein formula. A complete feed for hogs from weaning to 70 lbs. This is a finely ground feed.
- **Swine Grower/Finisher** - 16% Protein formula. A complete feed for hogs from 70 lbs. to finishing weight. This feed is finely ground.

## Other Feeds

- **All Stock Sweet Feed** – 14% Protein. This feed is in a medium grind loose mash, and can be fed to all classes of livestock, usually at a rate of 1% to 2% of body weight, or in the case of swine or poultry, as a complete ration.
- **Dairy Feed** – 16% Protein formula. Formulated for all lactating animals, including cows, sheep and goats. This feed is in a medium grind loose mash. Start feeding at a rate of 1% of body weight and increase ration to 2% if desired.

*Are you looking for a feed that's not on this list? Just ask, we can likely produce it!*
